

April is Dental Health Month, so what better time to let you know about all the exciting events taking place at the Carriage Place Dental Centre. After bringing on Tracey McGarry, our second full-time hygienist, and Dr. Danie Bujold, who practices here one day per week, we are again running out of room! We are therefore in the process of gearing up our fourth treatment room with all the latest equipment. We want to make sure we can accommodate your treatment needs promptly and efficiently because we appreciate your trust in us. If you have any friends or family members who require dental treatment or have concerns about their oral health, we would be happy to address their needs as well. New patients are always welcome!

TRAVELLING DENTISTS...

For those patients of Dr. Bujold who may be wondering where she has been these past few weeks, she is currently on a **dental mission** to Guatemala through a non-profit Christian organization based out of Seattle, Washington. We are very proud of her and are eager to hear about her adventures when she returns at the end of March.

Dr. Pyke has been on the move as well, but not to such exotic locations! She is completing a comprehensive three-part **continuing education course in dental implants** in Toronto with the Misch Institute. Dr. Carl Misch is an acknowledged leader in this field, and Dr. Pyke is excited to be making these advanced treatment techniques available to her patients. **This is of special interest to anyone with multiple missing teeth or loose or uncomfortable dentures.** Dental implants are a wonderful option for providing stable, comfortable, and aesthetic restorations.

In May, both Dr. Pyke and Dr. Bujold will travel to the Dawson Center, a world renowned institute for **advanced dental treatment planning** in Florida. Dr. Peter Dawson has been one of the most influential clinicians and teachers of all time in the dental profession. His comprehensive approach to treatment planning, his attention to detail, and his uncompromising standards of excellence and dedication to patient well-being are all qualities to which we aspire at the Carriage Place Dental Centre. It is exciting to be bringing these techniques and philosophies home to our patients because they apply to everything from simple fillings to complete smile makeovers and full mouth reconstructions.
