

IN OTHER CONTINUING EDUCATION NEWS...

The Canadian Dental Association and the provincial governments have announced **new 2010 guidelines and regulations pertaining to the sterilization and disinfection standards** in the dental office. The Carriage Place Dental Centre has always strived to maintain the highest standards of infection control, and with this in mind, the entire team is attending a continuing education course in Moncton on April 10, 2010 that will address these changes. The course is being given by Dr. Trey Petty, who is an acknowledged expert in this field. We are certainly looking forward to hearing what he has to say and to implementing any recommendations he makes.

The team will also be travelling to Halifax next month (April 2010) to participate in a hands-on continuing education course in laboratory techniques for taking, pouring up, grooming, and mounting accurate dental model records. This course will be given by Henry Hintze, a Master Dental technician from Germany.
